

ULTRA DL ZC

(Ref. 11055202)

Sanding stainless steel, steel, special steels, aluminium
Usage extrême

Norm: EN13743

Photo et textes non contractuels

Product Information:

Curved hemp flap disc
Designed for very hight material removal without heat build-up on steel a nd stainless steel.
Cotton flaps provide consistent abrasion without glassing even at medium and low pressure.
The increased number of zirconium grains provides high stock removal.
Excellent zirconium quality in terms of grinding speed and stock removal.
The hemp backing allows the grinding of the backing to use the entire surf ace of the flaps of the disc as well as to adjust the backing to give more fl exibility to the flaps.
Natural hemp fiber backing: eco-responsible product with low impact on th e environment.
Thermo-absorbent backing: the ground part heats up less and does not bl acken.
Anti-vibration support: significant increase in the efficiency of the flaps.
Semi-rigid support: optimized grinding surface of the flaps.
Material made of 70 % hemp fibers and 30 % non-polluting polypropylene binder.
Work on an angle of 15° to 25° while maintaining a good sanding surface.
Applications: stainless steel, steel, special steels, aluminum
Abrasive: Zirconium

Technical characteristics:

Height (cm) : 1.50
Width (cm) : 12.50
Length (cm) : 12.50
Net weight (Kg) : 0.10
For machine Grinder
Diameter D (mm)
Bore (mm) 22.23
Max. speed (rpm) 12 200
Speed (m/s)
Composition of the product
Product support Hemp fibre support
Hub Curved
Grain
