Product Information:

The TSA 300 battery-powered cutter stands out for its superior cutting per formance, sturdiness and compact design.
With its powerful battery, it has the same cutting capacity as a thermal cu tter, but is much lighter and can be used indoors.
Powerful EC engine: silent, low-vibration and low-maintenance, the EC eng ine delivers excellent cutting performance, comparable to that of a petrol saw.
STIHL Power Management System: allows the power and temperature of t he engine to be adjusted to suit the application, directly from the machine 's control panel.
Disc stopping time of 4 seconds: the disc deceleration brake with regener ative function allows the cutting disc to be braked in 4 seconds (dependin g on the disc and battery used) and work resumed almost immediately.
During braking, the kinetic energy is converted into electrical energy and f ed into the battery, increasing its autonomy.
Easy to handle: thanks to its compact design, low weight, ergonomic hand le and easy start-up with LED display.
Quiet: can be used in noise-sensitive areas.
STIHL magnetic filter: the cooling air flow passes through magnets that att ract and retain magnetic particles before they reach the engine.
Versatile: thanks to the water connection, you can work both indoors and outdoors.
Can be used in the rain: like all AP SYSTEM battery-powered units.
Operating time with the recommended AP 500 S battery: 20 minutes on p aving stones, 8 minutes on concrete.

Technical characteristics:

Height (cm) : 40.00
Width (cm) : 27.00
Length (cm) : 70.00
Net weight (Kg) : 10.85
Power(kW)
Sound level (dBA)
Cutting thickness (mm)
Disk diameter (mm)
Disk bore (mm)
