Product Information:

Intensive cutting of ultra-thin ceramic sandstone slabs in large format, and Height (cm): 14.00 ceramic tiles.

Manual cutting system for slabs up to 3600 mm long and between 3 and 1 $\,$ 0 mm thickness.

The system consists of:

- three 1200mm connectable aluminium guides
- a steel cutting unit with two 10mm or 22mm diameter scoring wheel slot
- a micrometric separation clip

Light, easy-to-carry and easy-to-use set

High stability anodized aluminum guides, tracing does not move thanks to the non-slip cords

The cutting unit runs through the guide on four U-throated pebbles, each machined to the exact shape of the guide's rails.

This system ensures a perfect alignment of the cart and thus removes all clearances, providing an accurate tracing of the wheel.

Technical characteristics:

Width (cm): 12.00 Length (cm): 126.00 Net weight (Kg): 7.40 Tile width (mm) 3600 Tile thickness (mm) 3 to 10

Wheel dimensions Ø x thickness (mm) 10 x 3 and 22 x 6 x 5

Supplied with:

- carrying bag
- a carbide scoring wheel coated titanium diameter 10 mm
- a carbide scoring wheel coated titanium diameter 22 mm on bearing
