

PRO SLIDE 3600

(Ref. 20116199)

Dry manual cutting of large-format slabs
Usage intensif

Guarantee: 3 ans

Photo et textes non contractuels

Product Information:

Intensive cutting of ultra-thin ceramic sandstone slabs in large format, and ceramic tiles.
Manual cutting system for slabs up to 3600 mm long and between 3 and 10 mm thickness.
The system consists of:
- three 1200mm connectable aluminium guides
- a steel cutting unit with two 10mm or 22mm diameter scoring wheel slots
- a micrometric separation clip

Light, easy-to-carry and easy-to-use set
High stability anodized aluminum guides, tracing does not move thanks to the non-slip cords
The cutting unit runs through the guide on four U-throated pebbles, each machined to the exact shape of the guide's rails.
This system ensures a perfect alignment of the cart and thus removes all clearances, providing an accurate tracing of the wheel.

Technical characteristics:

Height (cm) : 14.00
Width (cm) : 12.00
Length (cm) : 126.00
Net weight (Kg) : 7.40
Tile width (mm)
Tile thickness (mm) 3 to 10
Wheel dimensions Ø x thickness (mm) 10 x 3 and 22 x 6 x 5

Supplied with :
- carrying bag
- a carbide scoring wheel coated titanium diameter 10 mm
- a carbide scoring wheel coated titanium diameter 22 mm on bearing
